# Source global medical products efficiently, connect lastingly

At FIME, the largest medical trade show in the Americas, our main purpose was to create a unique platform where the global medical community could efficiently source the latest medical products from around the world and establish lasting connections. We listened to your needs, and we delivered an event that not only showcased the ultimate advancements in healthcare but also fostered valuable networking opportunities.

Held in Miami Beach, this year's show edition enabled 13,860 professionals in the medical industry from 116 countries to connect with 1,204 exhibitors from around the globe. The event allowed attendees to discover and acquire cutting-edge medical products, network with medical dealers and distributors, industry leaders, manufacturers, decision-makers, policy makers, and healthcare experts. Our event provided a matchless opportunity to explore business prospects, witness technological developments, and build enduring partnerships.

The Florida International Medical Expo was designed to help visitors and exhibitors achieve their goals, drive their businesses forward, and enhance their presence in the medical industry. The event also featured empowering educational sessions on critical topics shaping the future of healthcare.

This year, FIME created new opportunities for the global medical industry and set the stage for even greater accomplishments in 2025 and beyond. This report summarizes the potential and outcomes achieved, paving the way for new ambitions and advancements at FIME 2025.

"For Infinium the 2024 FIME exhibition was a milestone for both the growth of our product lines and the impact of the show. We had great client meetings, and expanded space that attracted more foot traffic and interest from partners and customers from many different countries. We are looking forward to next year."

Justin Jeffries Marketing Director at Infinium Medical

of exhibitors were satisfied with the opportunity to meet medical dealers and distributors at FIME

of exhibitors were satisfied with accomplishing their objective of meeting new business contacts

"Exhibiting at FIME 2024 in Miami was an incredibly positive experience for ISS Medical. We were thrilled with the enthusiastic interest from representatives and distributors in our OxiplexTS200 non-invasive, FDA-cleared tissue oximeter. Additionally, attending several presentations at the Innovation Hub provided valuable insights into what we need to do to successfully enter and sell in the US and global healthcare markets. The event was instrumental in helping us understand the nuances of market entry and further solidified our presence as a leader in the tissue oximetry market."

#### James P. Keeler, Marketing Director at ISS Medical

## Industry Benchmark: 27.8

"We have been repeating booth sponsors at FIME and continue each year because of the value we find in introducing our services to the broader international community. FIME 2024 opened up additional markets we had not seen much participation in in the past. If our numerous after-show follow-ups are any example, this will be the best year results we have seen from our participation. We signed up for another booth for 2025 since FIME continues to deliver on providing the best platform in the medical support field."

"Protech Medical considers FIME home. Each year FIME delivers more distributors and high-quality sales opportunities throughout Latin America. With each year we see hard work pay off with higher attendance and a larger international market presence. As manufacturers showcasing our wide range of radiation safety products, there is no other show matching the value FIME can offer. We are very happy to call FIME home."
