THE EXHIBITION

TRANSPOTEC LOGITEC is one of the most recognized events across Europe in the freight transport sector and logistics: a complete showcase on products, technologies and solutions for all segments.

The next edition will run from 8 to 11 May 2024, at the fieramilano exhibition centre: located in what is today considered Italy's leading logistics hub (Lombardy) that has contributed to make TRANSPOTEC LOGITEC the key event for the whole industry.

Moreover, the exhibition is getting ready to share, thanks to the collaboration of many associations and media of reference, challenges and emergencies that the sector is facing: the future of this industry, that represents an important engine of national economy, will depend a lot on its ability to evolve and capitalize on opportunities offered by both technology and sustainability.

THE EXHIBITION OFFERING

TRANSPOTEC LOGITEC: an offering that represents all market components

In the next edition, TRANSPOTEC LOGITEC aims to give space to the many parts of the transport goods, especially focused on road transport – heavy and light vehicles, aftermarket, trailers and semi trailers – but the attention will be increasing on logistic solutions, being now the two markets closely linked.

All product categories:

TRANSPORT

Heavy goods vehicles | Light goods vehicles | Trailers and semi-trailers | Special vehicles for all transportation types | Components and spares (aftermarket) | Tyres | Fuels and additives | Equipment & accessories for body shops and workshops | Technological equipment and on-board electronics | IT solutions | Institutions

LOGISTICS

Related services | Containers & tanks | Train wagons and engines | Logistics operators | Carriers & couriers | Road haulage | Ports, interports, intermodal terminals | Intermodal operators | IT solutions | Institutions | Consultancy firms | Real estate firms | E-commerce logistics

The exhibition layout

A close-up photograph of a person's hands on a steering wheel, driving a vehicle. The person is wearing a blue and white checkered shirt. The background is blurred, showing a road and some greenery. A bright light source, possibly the sun, is visible in the upper right, creating a lens flare effect. The text "VISITOR PORFILE" is overlaid in large, white, bold, sans-serif capital letters across the center of the image.

VISITOR PORFILE

VISITOR PORFILE

Truckers, fleet owners, large-scale distribution, couriers and owner-drivers, distributors, rental companies and services, logistic manager, logistics operators, e-commerce operators, harbours and interports, energy and green manager will find at Transpotec Logitec a full offer that is able to respond to every specific need.

WHAT OUR BUYERS SAY

PROMOTIONAL CHANNELS

Choosing **TRANSPOTEC LOGITEC** means having numerous promotion opportunities and visibility, before, during and after the exhibition.

The communication plan, which includes on and off line tools, allows both Transpotec Logitec and its clients to be always reachable on the market, maintaining a constant dialogue with the whole community.

All exhibitors will have a personal page on the catalogue of the exhibition, in which they can present their innovative products.

THE EVENTS

Workshops, conferences and seminars will complete the exhibition offer, creating interesting opportunities for discussion on market trends and the challenges facing the sector.

Do not miss test drives that will take place in outdoor areas adjacent to the pavilions, as well as rallies of decorated and unique vehicles that will make the visit to the fair a great experience.

SUSTAINABLE MOBILITY OF GOODS AND PEOPLE

Transpotech Logitec, Italy's leading event for trucking and logistics, and **NME – Next Mobility Exhibition**, the event dedicated to vehicles, solutions, policies and technologies for a sustainable mobility system will be held simultaneously from the next edition at **Fiera Milano**.

The two exhibitions will each maintain their own identity, but will offer added value to operators interested in both markets.

The physical proximity will allow important opportunities for discussion on aspects common to the two sectors. First of all, the **energy transition** and **new prospects for infrastructure renewal**, key issues for the sustainable development of transport and logistics for goods and people, especially in view of the deadlines set at European level.

The contact point between the two markets will be the new increasingly sustainable motorizations, the common need for recharging infrastructure, and R&D efforts to develop innovative and increasingly widespread technologies to reduce or zero emissions and improve travel times.
