FIERA MILANO

NME – NEXT MOBILITY EXHIBITION IS THE INTERNATIONAL BIENNIAL TRADE SHOW DEDICATED TO SOLUTIONS, TECHNOLOGIES, VEHICLES AND POLICIES FOR AN INTEGRATED, INNOVATIVE AND SUSTAINABLE MOBILITY SYSTEM FOR PEOPLE.

The exhibition which gathers leading companies and both national and international stakeholders, will take place in **Milano**: the sixth city in the world for green mobility and one of the earliest italian cities to have an Urban Plan for Sustainable Mobility.

BETWEEN SUSTAINABLE DEVELOPMENT AND INNOVATION

One of the goals of the **Agenda ONU 2030** for Sustainable Development, talk about sustainable cities and communities: it is expected that by 2030 quality, efficiency and sustainability of transportation is improved and in particular, that administrations are able to ensure reliable and environmentally sustainable transport systems.

Add to this the **UE Green Deal** which has set the ambitious target of zero-emissions by 2050 and reduction of the 90% of greenhouse gas transports' emission: a challenge and at the same time, a chance for Italy and for Europe.

The tools to promote a more sustainable and smart mobility are already available and are to be found precisely in technological innovation and in a sustainable vision of the transport system: pillars on which the Project NME – Next Mobility Exhibition is built.

THE SCIENTIFIC TECHNICAL COMMITTEE

Created with the aim of building a tailor-made project for the market, the scientific technical committee is the real driving force of the exhibition.

Fiera Milano, leading organizer of exhibitions, congresses and events, together with **AGENS**, **ANAV** and **ASSTRA** – partner associations of the project which represent the 95% of the Italian bus transportation market – that are promoters and organizers of the meeting, as well as members of the Scientific Technical Committee which includes the **associational, academic and institutional realities** of the entire integrated collective transportation industry.

A system choice that will allow to built, even in 2024, a project in line with a shared vision and able to answer proactively to the need of change that the great challenge of the energy transition requires.

THE EXHIBITION LAYOUT

FIERA MILANO is the biggest italian exhibition center and one of the largest exhibition district in the world.

NME – Next Mobility Exhibition is held in partial conjunction with Transpotec Logitec (Transport and Logisitcs Exhibition).

VISIBILITY AT THE EXHIBITION

➤ **NME – Next Mobility Exhibition** provides your company with a range of possibility and measures to get more visibility at the fair and to reach new potential customers:

➤ SPECIAL EVENTS ◀

Do you want to hold your event at the fair or in the city?
You will have at your disposal our experience.

➤ SPONSORSHIP ◀

Bags for visitors, pens, lanyards or graphics for setting up special areas in the fair: placing your logo on these media will allow your brand to have maximum visibility.

➤ PROMOTIONAL ACTIVITIES ◀

Included in the bags distributed to visitors, front desk promotion or banners: whatever your goal is, we have the solution that will allow you to get to your target.

YOUR TRAVEL AGREEMENTS

From travel to stay in Milano, up to the organization of your events during the exhibition or in the city, MiCodmc is available to organize your stay in every detail: travel, hotel booking, transfer or any other service.

For more informations, send an e-mail at **nme@micodmc.it**

Agreements with hotel facilities in Milano and in close proximity to the fairgrounds

Partnership with the major airlines to ensure the best conditions

Rail transportation facilities

Support for facilitation of exhibitors events during fair days: MiCodmc is available to organize a private event or for a dinner for clients, with proposals for any budget and number of guests

Tota supportl in organizing exclusive tours and excursions to experience the city and its surroundings in a special and unique way through the choice of classical cultural visits, unusual routes and shopping tour.

SUSTAINABLE MOBILITY OF PEOPLE AND GOODS

➤ ————— ➤

NME – Next Mobility Exhibition, the event dedicated to vehicles, solutions, policies and technologies for a sustainable mobility system and **Transpotec Logitec**, Italy's leading event for trucking and logistics, will be held simultaneously from the next edition at **Fiera Milano**. The two exhibitions will each maintain their own identity, but will offer added value to operators interested in both markets.

The physical proximity will allow important opportunities for reflection on aspects common to the two sectors. Firstly, the **energy transition** and new **prospects for infrastructure renewal**, key issues for the sustainable development of transport and logistics for goods and people, especially in view of the deadlines set at European level. The contact point between the two markets will be the new increasingly sustainable motorizations, the common need for recharging infrastructure, and R&D efforts to develop innovative and increasingly widespread technologies to reduce or zero emissions and improve travel times.
